

preventive program that was implemented by company management beginning in 2000 has successfully reduced the incidence of beryllium sensitization, as defined by the occurrence of confirmed abnormal BeLPTs. However, the follow-up has thus far been limited to current workers, the duration has been too short to document a reduced incidence of CBD, and it is possible that sensitization has been delayed, rather than prevented. Evaluation of this program's effectiveness would therefore be more complete by including individuals who have left employment and documenting

whether: (1) The program was effective at two other facilities at which it was implemented, (2) the program prevented beryllium sensitization over a longer period of time (i.e., up to eight years); and (3) the program prevented CBD, which generally takes longer to develop.

Study Design

This proposed study is designed to evaluate the effectiveness of a comprehensive preventive program at three beryllium plants. Approximately 579 eligible workers for this survey include those hired between implementation of a comprehensive

program (2000) and December 31, 2008, including any already known to be sensitized. NIOSH will offer all eligible current and former workers the BeLPT to identify sensitization and administer a work and medical history questionnaire.

There are no costs to former worker respondents except their time to participate in the interview; current workers will participate during work hours and thus compensated by their employer, and former workers will participate during their own time. The total estimated annualized burden hours are 193.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Number of respondents	Number responses per respondent	Average burden/response (in hours)
Former workers	113	1	45/60
Current workers	80	1	45/60
Participant Consent and Authorization for Release of Information	193	1	15/60

Dated: October 2, 2007.

Maryam I. Daneshvar,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Advisory Council for the Elimination of Tuberculosis (ACET)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following meeting of the aforementioned committee:

Times and Dates:

8:30 a.m.-5 p.m., November 27, 2007.

8:30 a.m.-12:30 p.m., November 28, 2007.

Place: Corporate Square, Building 8, 1st Floor Conference Room, Atlanta, Georgia 30333. Telephone (404) 639-8317.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 100 people.

Purpose: This council advises and makes recommendations to the Secretary of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding the elimination of tuberculosis. Specifically, the Council makes recommendations regarding policies, strategies, objectives, and priorities; addresses the development and application of new technologies; and reviews the extent to which progress has been made toward eliminating tuberculosis.

Matters to be Discussed: Agenda items include issues pertaining to Foreign-Born and Immigration Issues; Legal Border Issues; and National Tuberculosis Training and Education Centers, and other related tuberculosis issues.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Margie Scott-Cseh, Coordinating Center for Infectious Diseases, Small Business Unit, 1600 Clifton Road, NE., M/S E-07, Atlanta, Georgia 30333. Telephone (404) 639-8317.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** Notices pertaining to announcements of meetings and other committee management activities, for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: October 2, 2007.

Elaine L. Baker,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention (CDC).
